### DETAILED ACTION

1. Applicant's amendment, filed 12/29/04, has been entered.  
Claim 35 has been canceled. Claims 1-20 and 22-34 have been canceled previously.  
Claims 1, 3-8 and 12 have been amended.

Claim 21 is pending.

2. Upon the record at that time, the instant application as in condition for allowance.

However, a New Grounds of Rejection has been set forth herein.

3. The non-statutory double patenting rejection, whether of the obvious-type or non-obvious-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Orman*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321 (b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78 (d).

Effective January 1, 1994, a registered attorney or agent of record may sign a Terminal Disclaimer. A Terminal Disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 21 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 5-7, 10 and 13-15 of copending application USSN 10/638,172.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the pending claims of both the instant and copending applications are drawn to the same or nearly the same methods of treating glomerulonephritis with anti-TGF- $\beta$  antibodies as they read on the elected invention of copending application USSN 10/638,172. Therefore, the instant and copending claims would anticipate on one another.

This is a *provisional* obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicant has not addressed the copending claims of USSN 10/638,172.

5. Applicant is invited to verify that the status and relationship of the priority documents on the first line of the instant specification is current.

Art Unit: 1644

6. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Applicant should restrict the title to the claimed invention, namely, methods of decreasing the accumulation of extracellular matrix associated with glomerulonephritis with anti-TGF- $\beta$ -specific antibodies.

7. No claim allowed.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (571) 272-0844.
